Double Protected Fat Powder

سازمان اچ پی سی کتور

Making a health license

251226

- New generation of protected fat powder
- Dual protection in the ruminal environment
- Concomitant use of pure fat and calcium
- Meet the needs of omega-3 and omega-6 essential fatty acids
- More ruminal protection (up to 85%) with better digestibility
- Support the production of milk with more fat
- Reduce heat stress

Benefits of Persiafat ProMix

Insulated four-layer bags

25 kg

- A fat powder that combines the effectiveness of two types of pure and calcium fat powders
- Essential fatty acid-rich with many dual bonds (PUFA)
- High digestibility (85%)
- With dual protection technology, there is no impact on the ruminal environment
- Unique physical form (pellet crumble)
- Contains fat-soluble vitamins (A, D, E)

Approximate nutritional value

Other Fatty acids	Total omega 3	Linoleic acid	Oleic acid	Stearic acid	Palmitic acid	Ruminants' metabolic energy (ME)	Pure lactation energy (NE _L)	moisture	Calcium	fat
%2	%2	%18	%22	%26	%30	7/3 Mcal/kg	5/8 Mcal/kg	%2	%4	%92

Double Protected Fat Powder

Consumption

Sheep and goat	Fertile cows	Lactating cows with a medium output	High output lactating cows	First-calf heifer	Cows and heifers in calving order (Close-up)	Consumption class
20 - 50	100 - 400	200 - 400	400 - 800	200 - 500	100 - 250	Grams per day / per livestock
